Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2026-February-11

Agenda:

- Approval of minutes of the January 21st meeting.
- Approval of minutes of the January 28th meeting.
- Approval of statement for the February 4th meeting.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
    - Reduce the size of our container matrix (containers#887)
    - Proposal: Require PRs to be accompanied by an issue (adoptium#272)
- January 2026 release status
    - Expected January 20th (25.0.2, 21.0.10, 17.0.18, 11.0.30, 8u482)
    - Release champion: Shelley Lambert
    - Compliance champion: Antonio
- AoB

Action items:

Date	Description	Status
2026-01-07	George to discuss with Martijn about the suitability of shipping Microsoft's critical patches for OpenJDK 21 and 25 on Windows Arm 64	Open

Attendees

- [ ] George Adams
- [x] Stewart Addison
- [x] Carmen Delgardo (guest)
- [x] Tim Ellison
- [x] Scott Fryer
- [x] Severin Gehwolf
- [x] Shelley Lambert
- [x] Andrew Leonard
- [x] San Hong Li
- [ ] John Oliver
- [ ] Martijn Verburg

Meeting called to order at 14:02 GMT

Minutes:

- Approval of minutes of the January 21st meeting.
    - Approved.
- Approval of minutes of the January 28th meeting.
    - Approved.
- Approval of statement for the February 4th meeting.
    - Approved
- Review of outstanding actions.
    - No update this week.
- Review of GitHub issues and discussions flagged for PMC agenda
    - Reduce the size of our container matrix (containers#887)
        i. The Docker Inc have noted that the size of supported base OSes is growing, and they wish us to review the number that we have in our update patch which is now causing them issues with automation.
        ii. PMC's next step is to review the set with the community, paying specific attention to Alpine, and check the set that we are comfortable providing.
        iii. Socialise a proposed approach on the Slack containers channel for removing older versions and Alpine, and then potentially other OSes.
        iv. Worth noting to Docker that this is something of a consequence of having multiple LTS versions in flight at the same time.
        v. Consider splitting versions across different container images so we don't block on availability of all (which requires simultaneous availability) - but noted that would be a breaking change for users.
    - Proposal: Require PRs to be accompanied by an issue (adoptium#272)
        i. Leave this open to let more public discussion take place in the issue before defining a policy.

        ii. Generally useful for feature work. Also helpful to encourage people to explain the problem they are trying to solve rather than just describe the fix they are proposing.
        iii. Bring this back to the PMC at a later meeting.
- January 2026 release status
    - Expected January 20th (25.0.2, 21.0.10, 17.0.18, 11.0.30, 8u482)
    - Release champion: Shelley Lambert
    - Compliance champion: Antonio
    - Release is completed and containers have been published.
        i. The release retrospective was held yesterday, with new ways to improve speed and delivery identified. The compliance project retrospective is scheduled for later today.
        ii. Scorecard was encouraging, but some primaries were delayed causing an impact on the overall reporting.
        iii. Stabilised Arctic recordings, particularly on Linux led to good release experience and prompt availability of the binaries.
- AoB
    - Headless builds
        i. Some further discussion about the value of only publishing headless for those platforms where the UI is not going to be broadly used.
        ii. Would require some further discussion with users about impact.
    - Severin: JDK 26 - March 17, 2026, RC1 - 26+34 (aix/ppc build)
        i. PPC is still not building, and the release date is approaching.
        ii. Cause is infrastructure (AIX 7.2SP7 is required - our machines are currently on SP5) and a fix is in process at the moment.
    - Carmen asked PMC members to encourage committers to stand for the WG SC election.
    - Progression of the Eclipse IDE plug-in proposal sent to the mailing list.
    - Machine capacity for April? (Some initial aarch64 tests at https://github.com/adoptium/infrastructure/issues/4135)
        i. Following loss of Equinix machine capacity, question is whether there is enough for the April release.
        ii. Scott is assessing the load now that the testing has been updated to work on the latest versions.
        iii. Sxa noted that these machines are used extensively for different binary deliveries. Shelley is looking at the queue times for scheduling the work, and reminded that dynamic workers would likely be advantageous.
    - Celebrating notable project successes
        i. The work on stabilising the Arctic work is a good candidate.

Meeting closed at 14:38 GMT
