Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2026-March-4

Agenda:

- Approval of minutes of the February 25th meeting.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
    - Reduce the size of our container matrix (containers#887)
    - Proposal: Require PRs to be accompanied by an issue (adoptium#272)
    - Please consider building Javadoc API documentation and including it in releases (temurin-build#4395)
    - Installing first RPM for temurin-25-jre and afterwards temurin-25-jdk fails because of install files conflicts (adoptium-support#1420)
- Moving the PMC meeting invite to a shared calendar.
- AoB

Action items:

Date	Description	Status
None		

Attendees

- ☑ George Adams
- ☑ Stewart Addison

- [x] Carmen Delgardo (guest)
- [x] Tim Ellison
- [x] Scott Fryer
- [x] Severin Gehwolf
- [x] Shelley Lambert
- [x] Andrew Leonard
- [x] San Hong Li
- [x] Tanja Obradovic (guest)
- [ ] John Oliver
- [ ] Martijn Verburg

Meeting called to order at 14:02 GMT

Minutes:

- Tanja Obradovic joined the PMC meeting as a guest.
- Moving the PMC meeting invite to a shared calendar.
    - Topic was moved earlier in the agenda.
    - Tanja has proposed to move the PMC meeting to a public Adoptium Working Group Calendar
    - This would be open to the steering committee members and is managed by the Eclipse foundation directly.
    - Changes to the Calendar can be made by George, Shelley and Tim.
    - Carmen suggested that the timezone follows European time.
- Approval of minutes of the February 25th meeting.
    - Approved.
- Review of outstanding actions.
    - None.
- Review of GitHub issues and discussions flagged for PMC agenda
    - Reduce the size of our container matrix (containers#887)
        i. No update this week.
    - Proposal: Require PRs to be accompanied by an issue (adoptium#272)
        i. No update this week.
        ii. Shelley noted that we can use flags to indicate features and bug fixes etc. There is a higher expectation of linking PRs to issues that describe features than simple bug fixes.
    - Please consider building Javadoc API documentation and including it in releases (temurin-build#4395)
        i. Discussed last week. The issue needs updating.
        ii. ACTION: Tim update the issue regarding including Javadoc in releases (temurin-build#4395).
    - Installing first RPM for temurin-25-jre and afterwards temurin-25-jdk fails because of install files conflicts (adoptium-support#1420)
        i. Scott reviewed the options for structuring the packaging artefacts to avoid conflict errors seen by end users.

        ii. Severin gave some insight about how the JRE is no longer a subset of the full JDK as it was in previous releases such as JDK8.
        iii. The various implications of having conflicting installs was discussed. Users may be better served by having a much smaller image with minimal Java runtime, or providing further guidance on using jlink to create a customised runtime layout.
        iv. DECISION: The PMC agreed to revert the buildID injection into current in service packages (for JRE), but announce and introduce a conflict in JDK26 with explanation to use a jlink custom JRE if required in future major releases.
- AoB
    - Dennis has sent an email to the pmc mailing list asking for PMC action, but this did not make it onto the list.
        i. Carmen briefly outlined the topic and will investigate why it was not received by the PMC.
    - Github immutable releases
        i. George noted that the Github immutable release feature is now generally available.
        ii. It would be beneficial for the project to have immutable releases, but noted that the Temurin publication process may depend upon being able to progressively make artefacts available through GitHub as they become available by the build system.
    - Tanya and Carmen left the meeting at 14:30
        i. The “pre-release” capability of a release repo may provide the necessary flexibility.
        ii. There have been occasions where invalid metadata broke the Adoptium API, and we’d need the ability to fix any such things in future too.

Meeting closed at 14:35 GMT
