

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2023-August-09

Agenda:

- Approval of [minutes](#) from August 2nd meeting.
- Review of [GitHub issues flagged for PMC agenda](#).
- July PSU Temurin 20.0.2, 17.0.8, 11.0.20, 8u382.
 - Release champion: Stewart Addison/Scott Fryer
 - Release checklist ([adoptium/adoptium#238](#))
 - Platform status ([adoptium/adoptium#239](#))
 - Retrospective ([adoptium/adoptium#240](#))
- Rolling out support for custom CA certificates ([containers#392](#))
- Feedback from meeting with MacStadium last week.
- Zurich colo (Nine) equipment recovery.
- AoB

Action items:

Date	Description	Status
2023-06-21	ACTION: sxa to ask EF to send notice to end contract with Nine.	In progress
2023-07-12	ACTION: sxa to ask EF to set up Slack-Matrix bridge	In progress
2023-07-19	ACTION: George to check the EF stance on using AI generated code (ChatGPT/CoPilot)	Open

Attendees

- ☒ George Adams
- ☐ Stewart Addison
- ☐ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☐ Shelley Lambert
- ☒ Andrew Leonard
- ☒ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:03 BST

Minutes:

- Approval of [minutes](#) from August 2nd meeting.
 - Minutes of the previous meeting were approved.
- Review of [GitHub issues flagged for PMC agenda](#).
 - Non
- July PSU Temurin 20.0.2, 17.0.8, 11.0.20, 8u382.
 - Release champion: Stewart Addison/Scott Fryer
 - Release checklist ([adoptium/adoptium#238](#))
 - Platform status ([adoptium/adoptium#239](#))
 - Retrospective ([adoptium/adoptium#240](#))
 - Retrospective underway. Nothing for the PMC at this time.
 - ACTION: Tim to update the release notes to show that the AIX now prereqs v7.2. Earlier Temurin releases depended upon AIX 7.1 for all Java versions.
 - Discussion about the Harfbuzz failure in AIX dependency used by OpenJDK and how we could have helped to find it sooner.
- Rolling out support for custom CA certificates ([containers#392](#))
 - Temurin 20 containers have been running the changes and no breakages noted.
 - The remainder have been pushed today with Docker and we will keep an eye on them.
- Feedback from meeting with MacStadium last week.
 - Meeting with MacStadium resulted in a plan to move some more MacStadium machines into Orka at contract renewal.
 - The Orka system used by Adoptium needs reinstating as it was shut down due to inactivity.
 - MacStadium is interested in promoting the Orka benefits to the project publicly.

- We will also look to re-provision the Mac Minis on newer systems since the ones we are using are quite old now.
- Zurich colo (Nine) equipment recovery.
 - Shutdown has been officially requested - with a date of November 30th, 2023.
 - Removal of equipment can be done by project members or at cost by Nine staff.
 - Need to work on the plan for getting these out of the data centre and disposing of the equipment, or reusing it if we can for the project.
- AoB
 - API (api.adoptopenjdk.net) redirects
 - i. Note to the PMC that further requests to the adoptopenjdk API calls are being forwarded to api.adoptium.net at the DNS level by CloudFlare.
 - ii. Remaining services include Gradle, and GithubActions
 - John also has a PR open with set-up Java to reduce their dependencies on AdoptopenJDK
 - [Make the Adoptopenjdk package type look at the Temurin repo first for latest assets](#)
 - PR to the setup-java action to reduce the hits on adoptopenjdk API by going to adoptium API first to see if it is available (hotspot based builds only).
 - Gradle is still a heavy user of the adoptopenjdk API, so a to-do is to chase them to fix their usage.
 - Once setup-java and Gradle are dealt with there will be minimal calls to the old API and this logic can be replaced with static API responses to the few calls that still apply.
 - Should then consider hosting the Adoptium API in a more cost-effective way, and moving to a kube cluster that has redundancy.
 - The status issue for a release is in the adoptium/adoptium repository and is therefore not easily updatable by people who only have rights to temurin-build.
 - Proposal to create an adoptium/temurin repo to reflect the overall project issues and files there.
 - Reminder that we have Otterdog as a tool to do tasks like this.
