

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2023-October-25

Agenda:

- Approval of [minutes](#) from October 11th meeting.
- Approval of [statement](#) from October 18th.
- Review of outstanding actions.
- Review of [GitHub issues flagged for PMC agenda](#).
 - Change to use --with-freetype=bundled for Temurin jdk-11+ ([adoptium/ci-jenkins-pipelines#824](#))
- October PSU Release Planning.
 - Upstream GA tag due 17-Oct-2023
 - Release champion: Sophia Guo
 - Release status ([adoptium/temurin#6](#))
- Extending Temurin 11 support declaration ([slack ref](#)) <https://github.com/adoptium/adoptium.net/pull/2377>
- Docker updater script refactor
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

Action items:

Date	Description	Status

Attendees

- ☒ George Adams
- ☒ Stewart Addison
- ☐ Carmen Delgado (guest)
- ☐ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☐ Andrew Leonard
- ☒ San Hong Li
- ☒ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:03 BST

Minutes:

- Minutes of 11th and 18th approved
- October Release
 - [Windows JDK17/21](#)
 - AIX JDK11 and 17 issue with Harfbuzz preventing shipping. Proposal to float a patch to allow us to ship pending Harfbuzz update.
 - No PMC objections to shipping with a fix for this, but there was a question about whether we could propose that patch upstream to make it “official” in the interim
 - Linux/s390x floating patch for JDK21: [\[JDK-8311630\] \[s390\] Implementation of Foreign Function & Memory API \(Preview\) - Java Bug System](#) - straight cherry pick. Floating this patch to release a version of 21.0.1 was considered acceptable to the PMC. We will work on a formal floating patch process and then aim to progress this.
- JDK11 support date extension. [The PR](#) references Oracle JDK so cannot be taken as a reference, therefore the current message is insufficient to justify changing our support date on the website. We will need to solicit an explicit update from the openjdk project to confirm before making such a change.
- Docker update script refactor. Original script only handled Linux, not Alpine and Windows so those extras have made it much more complicated. PR to use a python/jinja script to simplify
- No update on GHSA-xrvg-mgj7-p5wh
- AoB:
 - Blog post? We can draft but not publish until Windows issue resolved
 - EclipseCon: Well received talks, and good questions being asked

Meeting closed at 14:36 BST
