

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

**Date:** 2024-January-17

## Agenda:

- Approval of [minutes](#) from January 10th meeting.
- Review of outstanding actions.
- Review of [GitHub issues flagged for PMC agenda](#).
  - Changed INSTALLDIR to fixed path to fix #422 and #600 ([installer#789](#))
- January CPU update
  - Checklist ([temurin#16](#))
  - Release Status ([temurin#17](#))
  - General Retrospective ([temurin#13](#))
- ORKA update.
- Equinix x64 system removal.
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

Date	Description	Status

## Attendees

- ☒ George Adams
- ☒ Stewart Addison
- ☒ Carmen Delgado (guest) joined 14:24

- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☐ Andrew Leonard
- ☐ San Hong Li (apologies)
- ☐ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

## Meeting called to order at 14:04 GMT

### Minutes:

- Approval of [minutes](#) from January 10th meeting.
  - Minutes were approved.
- Review of outstanding actions.
  - None
- Review of [GitHub issues flagged for PMC agenda](#).
  - Changed INSTALLEDIR to fixed path to fix #422 and #600 ([installer#789](#))
    - i. Deferred until after the release.
- January CPU update
  - Checklist ([temurin#16](#))
  - Release Status ([temurin#17](#))
  - General Retrospective ([temurin#13](#))
  - Code is tagged and release pipelines kicked-off. Triage underway.
  - Thanks to MSFT team for their contribution to the compliance work.
  - Priority is 21, 17, 11, 8 based on availability of code and machines. Primary platform target is two days, and seven days for secondary. Preference for completing fast running releases. In practice they are running in parallel at the moment and all making good progress.
  - Discussion that we promote 21 via the website download button for desktop users, but stats show enterprises predominantly use 17 and 11 so we prioritise the actual usage.
- ORKA update.
  - Test failures show no process isolation. Likely a k8s pod config issue rather than at the VM level.
  - George requests a succinct description of the desired isolation behavior so we can take that back to the provider.
  - Workaround in AQAvit helping, but not a permanent solution. Result history will show when the problem was introduced to help with diagnostics.
  - Reminder that we are still paying for the macMinis even though they are no longer in Jenkins.
  - Sxa suggests turn off all but one of each type after the release.
- Equinix x64 system removal.
  - Move awx server and solaris hosting to other locations.

- Skytap have some Intel provision we can utilise in addition to the AIX we are using.
- Update on GHSA-xrvg-mgj7-p5wh.
  - Roll over to a future meeting.
- AOB
  - Website redesign work is completed and need to move to the implementation phase.
  - SLES15 support has been updated on the website.

**Meeting closed at 14:25 GMT**
