

Adoptium

Project Management Committee

Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2024-April-10

Agenda:

- Approval of [minutes](#) of the previous meeting.
- Approval of [statement](#) for missed meeting.
- Welcome Scott to the PMC.
- Review of outstanding actions.
- Review of [GitHub issues flagged for PMC agenda](#).
 - adjust rpms and (maybe) repositories so Temurin JDKs can serve as replacement of non-system JDKs in Fedora ([installer#848](#))
 - migrate skaraMirror.sh to be a python script ([mirror-scripts#52](#))
- April PSU release - tags expected 16th April
 - 22.0.1, 21.0.3, 17.0.11, 11.0.23, 8u411
 - Release champion: Stewart
 - Pre-release work in progress.
- Removal of win32 from default triggers for April releases to avoid contention with win64
- Should we float a Linux/s390x JDK22u patch that is currently a stop-ship for 22.0.1?
 - Ref: <https://bugs.openjdk.org/browse/JDK-8329545>
- Jenkins system errors with Azure and Orka provisioning
- Temurin project progress review by Eclipse EMO ([gitlab#707](#))
- Trail of Bits report publication status
- Equinix x64 system removal.
- JFrog Artifactory banner “Free Trial until Nov 16...” ([link](#))
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

Action items:

Date	Description	Status
24-Jan-2024	ACTION: gdams to discuss with JFrog how to use symlinks in Artifactory. Trial this with the 'Rocky 9' to 'Rocky 8' installer path with a view to further roll-out. (ref installer#801)	In progress

Attendees

- ☒ George Adams
- ☒ Stewart Addison
- ☐ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Scott Fryer
- ☒ Severin Gehwolf (joined at 14:20)
- ☐ Shelley Lambert
- ☒ Andrew Leonard
- ☒ San Hong Li
- ☒ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:03 BST

Minutes:

- Approval of [minutes](#) of the previous meeting.
- Approval of [statement](#) for missed meeting.
 - Minutes of the meeting and the statement were deferred as there were insufficient attendees available to approve them.
- Welcome Scott to the PMC.
 - Scott was welcomed to the meeting, with thanks for taking on responsibilities of the PMC role.
- Review of outstanding actions.
 - George has spoken to JFrog. They will identify a new project manager to help work with the Adoptium, so the outstanding issues remain for the moment.
- Review of [GitHub issues flagged for PMC agenda](#).
 - adjust rpms and (maybe) repositories so Temurin JDKs can serve as replacement of non-system JDKs in Fedora ([installer#848](#))
 - i. The PMC decided this still requires further community discussion before coming to the PMC, so no further action here at the moment. Discussion to continue in the community.
 - migrate skaraMirror.sh to be a python script ([mirror-scripts#52](#))

- i. The mirror scripts are outgrowing the bash script, and may benefit from moving to Python, especially for the ability to create tests and future scalability.
 - ii. PMC are invited to take a look, review, and comment.
 - iii. Would benefit from running in parallel for a while with a diff-check to compare the mirrors, including those mirrored by both bash/python implementations.
- April PSU release - tags expected 16th April
 - 22.0.1, 21.0.3, 17.0.11, 11.0.23, 8u411
 - Release champion: Stewart
 - Pre-release work in progress.
 - Have now got the jdk22u mirror in place, with dry-runs of builds that have been useful.
 - Checking capacity of build farm for these releases.
- Removal of win32 from default triggers for April releases to avoid contention with win64
 - These are contending for the same resources on the Win64 CI/CD machines.
 - Proposal to remove the Win32 from automation as it is a lower priority.
 - This platform will be manually triggered when the resources allow for the April release.
- Should we float a Linux/s390x JDK22u patch that is currently a stop-ship for 22.0.1?
 - Ref: <https://bugs.openjdk.org/browse/JDK-8329545>
 - This is a fix for a breaking change on s390x Linux which is fixed in dev. Backport to jdk22u has been approved upstream.
 - DECISION: PMC agreed to cherry pick the patch referenced above for the April PSU.
- Jenkins system errors with Azure and Orka provisioning
 - Errors noted in the Jenkins log relate to Azure plug-in (deprecated) behavior. Plan is to move to the CLI. Should be safe to remove that plug-in at the next Jenkins update.
 - Orka warnings should also be cleaned up - maybe relate to storage capacity.
- AIX is not expected to be part of the April PSU jdk22
 - Needs migration to newer xlc compiler version 17 and AIX version - not currently being worked. Older java versions are using xlc v16.
 - i. <https://github.com/adoptium/aqa-tests/issues/5169>
- Temurin project progress review by Eclipse EMO ([gitlab#707](#))
 - No progress by PMC at the moment
 - Thomas will be extending the Otterdog tool to check templating of available files.
- Trail of Bits report publication status
 - Trying to arrange a final meeting with ToB before publication.
 - Still working on some of the issues raised.
 - Evaluating the suggested compiler options. Some relate to the Adoptium API.
- Equinix x64 system removal.
 - Docker host machines replaced with Azure machines - dry runs for the release are working with them.
 - Old AWX decommissioned.

- Solaris is moving to virtualbox on Azure, and tests are currently underway to ensure they are a good replacement.
 - Only outstanding issue is for a compliance machine.
- JFrog Artifactory banner “Free Trial until Nov 16...” ([link](#))
 - Informational - George will raise with the new JFrog contact as appropriate
- Update on GHSA-xrvg-mgj7-p5wh.
 - Work underway on code rewrite in this area
- AoB
 - Non

Meeting closed at 14:53 BST
