

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2025-June-10

Agenda:

- Approval of [minutes](#) of the June 4th meeting.
- Review of outstanding actions.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
 - JDK install on Ubuntu fails with HTTP 403 ([support#554](#))
 - Add Ubuntu 25.04 Plucky Puffin ([installer#1182](#))
 - Proposal: ubi10-minimal Support ([containers#769](#))
 - The self-invite call for for Adoptium Slack is not working ([adoptium.net#1195](#))
 - Support of Microsoft Windows Server 2025 ([support#1193](#))
- Equinix aarch64 service removal
- Temurin Compliance Project personnel changes
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

Action items:

Date	Description	Status
21-May-2025	ACTION: George will follow up with the raiser of containers#769 to explain the path forward for support of UBI10 base image.	Done

Attendees

- ☒ George Adams
- ☒ Stewart Addison
- ☒ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Scott Fryer
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ Andrew Leonard
- ☐ San Hong Li (apologies)
- ☐ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:02 BST

Minutes:

- Approval of [minutes](#) of the June 4th meeting.
 - Minutes of the meeting were approved.
- Review of outstanding actions.
 - UBI10 base image update has been merged recently in the containers repo. Updates in the issue.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
 - JDK install on Ubuntu fails with HTTP 403 ([support#554](#))
 - i. JFrog have been responding to our request for support, and asking for more information which has been provided.
 - ii. We believe that the issue is being seen less frequently now, but will continue to be worked.
 - iii. It was noted that we expect these problems would be resolved by serving from a static cache. Potentially could also disable the AWS URL redirection behavior of JFrog which would reduce the multiple redirects.
 - iv. Severin suggested that we encourage people to mirror the repository to reduce the load on [packages.adoptium.net](#).
 - Add Ubuntu 25.04 Plucky Puffin ([installer#1182](#))
 - i. PMC agreed that we will allow Temurin to be installed on that version of the OS, with a plan to catch-up with additional testing when machines are available.
 - Proposal: ubi10-minimal Support ([containers#769](#))
 - i. Discussed as part of actions completed.
 - The self-invite call for Adoptium Slack is not working ([adoptium.net#1195](#))
 - i. Historically handled via a Google Form and macros.

- ii. Since May Slack have disabled tokens used to authenticate to the invite action.
 - iii. Beyond Slack Enterprise version, it is not possible to let people add themselves automatically.
 - iv. Proposal to discuss this with Slack.
 - v. Could potentially use a mechanism that allows up to 400 invites as a temporary measure.
- Support of Microsoft Windows Server 2025 ([support#1193](#))
 - i. Needs to undergo testing before claiming support for this platform.
- Equinix aarch64 service removal
 - X64 servers were removed a while ago, and now report that the ARM provision will be discontinued at the start of August.
 - Some in compliance, and some in build/test.
 - Limited capacity still resides in OSUOSL, but we will need further for maintaining the current scope of usage.
 - Consider approaching OSU to increase capacity, but other ideas for provision would be good.
 - Sxa will liaise with George to explore options.
- Temurin Compliance Project personnel changes
 - A number of Fujitsu staff have started onboarding to the Compliance project.
 - A number of Red Hat folks will move out of the project, but not all. One will be moved into the project on a temporary basis.
- Update on GHSA-xrvg-mgj7-p5wh.
 - PRs are being raised to complete this.
- AoB
 - New website issue? <https://github.com/adoptium/adoptium.net/issues/1234>
 - i. For awareness
 - API server recycling
 - i. The API is not returning the latest version of Java EA so that is blocking the JDK25 work.
 - ii. George will ping John to assist.
 - Website rewrite in next js is progressing, as a way to replace gatsby.
 - i. Once this is working well further calls will be made to assist with testing.
 - Onboarding the Compliance
 - i. Thanks for attendance by Microsoft engineers.
 - ii. Plan to dry run on week beginning June 21st to gain familiarity. Folks leaving the project will be on call to assist if things break, but the idea is to see how well it progresses without them.

Meeting closed at 14:36 BST
