

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2025-February-26

Agenda:

- Approval of [minutes](#) of the February 5th meeting.
- Approval of [statement](#) for February 12th meeting.
- Approval of [statement](#) for February 19th meeting.
- Review of outstanding actions.
- Review of [GitHub issues flagged for PMC agenda](#)
 - Consider installing to /usr/lib/jvm/java-XX-temurin and provide (old location with virtual provides) ([installer#1008](#))
- Private discussion of IBM Cloud sponsored machines.
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

Action items:

Date	Description	Status
	None	

Attendees

- ☒ George Adams
- ☒ Stewart Addison
- ☒ Carmen Delgado (guest)

- ☒ Tim Ellison
- ☒ Scott Fryer
- ☒ Severin Gehwolf
- ☐ Shelley Lambert
- ☒ Andrew Leonard
- ☒ San Hong Li
- ☒ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:03 GMT

Minutes:

- Approval of [minutes](#) of the February 5th meeting.
 - Approved.
- Approval of [statement](#) for February 12th meeting.
 - Approved.
- Approval of [statement](#) for February 19th meeting.
 - Approved.
- Review of outstanding actions.
 - Non.
- Review of [GitHub issues flagged for PMC agenda](#)
 - Consider installing to /usr/lib/jvm/java-XX-temurin and provide (old location with virtual provides) ([installer#1008](#))
 - i. Required by RHEL & Fedora to be in a location that is expected by services on those distros.
 - ii. Suggestion is that the install location moves to a new location as per the issue, with a link from the old location installed for compatibility.
 - iii. Question about whether the virtual link would work for all.
 - iv. Proposal change for JDK24 as it will have limited impact. Would require additional testing to determine the impact.
 - v. PMC agreed on this approach.
- Private discussion of IBM Cloud sponsored machines.
- Update on GHSA-xrvq-mgj7-p5wh.
 - None this week.
- AoB
 - Migration Toolkit.
 - i. Plan to update to the PMC at the next week's meeting.
 - Reproducible build project
 - i. Carmen asked that the word "attestation" not be used by the Temurin project.
 - ii. The word can only be used by an Eclipse Foundation level process.
 - iii. This request has come from Eclipse legal. Projects can use alternative words such as "verification".

- iv. There was some discussion about the context in which the word is used by the project, this is a software artefact name rather than a legal concept or claim.
- v. Carmen will follow-up via alternative messaging channels.
- JARSigner abuse blog
 - i. <https://blogs.eclipse.org/post/mika%C3%ABl-barbero/eclipse-foundation-security-statement-jarsigner-abuse-malicious-actors>
 - ii. Informational: this blog addresses a security issue that uses Temurin's jarsigner runtime as an example, and shows that it is not Temurin specific.
- Azure credits
 - i. Thank you to the team for reducing the usage on Azure, this has made a noticeable difference, but we are still likely to overrun the allocated budget.
 - ii. The overrun should be manageable.
 - iii. Some discussion about further ways to reduce the cost of Windows licensing.
- ARM64 Equinix servers removal
 - i. These are expected to be removed from project sponsorship as a consequence of withdrawal from the "Works on Arm" initiative.
 - ii. We currently use three 160-core systems.
 - iii. Some additional capacity is available at OSUOSL which would be able to fill in some of the gap.

Meeting closed at 14:42 GMT
