

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

**Date:** 2024-January-24

## Agenda:

- Approval of [minutes](#) from January 17th meeting.
- Review of outstanding actions.
- Review of [GitHub issues flagged for PMC agenda](#).
  - Changed INSTALLDIR to fixed path to fix #422 and #600 ([installer#789](#))
  - Feature Request: Support Rocky 9 ([installer#801](#))
- January CPU update
  - Checklist ([temurin#16](#))
  - Release Status ([temurin#17](#))
  - Release Blog ([adoptium.net#2570](#))
  - General Retrospective ([temurin#13](#))
- ORKA update.
- Equinix x64 system removal ([Issue](#))
- Website implementation - next steps?
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

## Action items:

Date	Description	Status

## Attendees

- ☒ George Adams
- ☒ Stewart Addison
- ☐ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☐ Andrew Leonard
- ☒ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

## Meeting called to order at 14:02 GMT

### Minutes:

- Approval of [minutes](#) from January 17th meeting.
  - Approved.
- Review of outstanding actions.
  - There are none this meeting.
- Review of [GitHub issues flagged for PMC agenda](#).
  - Changed INSTALLEDIR to fixed path to fix #422 and #600 ([installer#789](#))
    - i. Deferred until after release
  - Feature Request: Support Rocky 9 ([installer#801](#))
    - i. Request for install support on Rocky 9, since our install paths include the version name.
    - ii. There is an open issue ([ref](#)) for collapsing into an unversioned path, or use symlinks.
    - iii. Would be more efficient to use a single copy through artefactory and CDN - even though these are likely to optimise in their implementation.
    - iv. ACTION: gdams to discuss with JFrog how to use symlinks in Artifactory. Trial this with the 'Rocky 9' to 'Rocky 8' installer path with a view to further roll-out.
- January CPU update
  - Checklist ([temurin#16](#))
  - Release Status ([temurin#17](#))
  - Release Blog ([adoptium.net#2570](#))
  - General Retrospective ([temurin#13](#))
  - Two platforms left to publish to complete the update, namely JDK8 AIX and JDK8 arm32 linux.
  - The PMC thanked all who contributed to this release.
- ORKA update.

- Rolled out 3.0.1 update which enabled host isolation. Still seeing some process interaction, so continuing discussion with the provider to achieve full isolation.
- Equinix x64 system removal ([Issue](#))
  - Continuing. We have moved some load to Skytap. Solaris provision is still waiting for resolution.
- Website implementation - next steps?
  - Still have funds for website implementation.
  - Has been some prototyping of the webpages undertaken.
  - Need to plan regular feedback to the implementers to ensure the data and content is available as the implementation progresses.
- Update on GHSA-xrvg-mgj7-p5wh.
  - No update this week. Some background work is being undertaken that will resolve it strategically.
- AoB
  - People reporting 403 on installer usage. Small number of occurrences and not fully understood about the cause.
  - Plan to report to Fastly since it seems to be related to their service.

**Meeting closed at 14:27 GMT**
