

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

**Date:** 2023-September-06

## Agenda:

- Approval of [minutes](#) from August 30th meeting.
- Review of outstanding actions.
- Review of [GitHub issues flagged for PMC agenda](#).
- Update on release of 11.0.20.1 and 17.0.8.1.
- Update on migration of Adoptium API production service from OpenShift Online, including Digital Ocean k8s fallback.
- Update on Steadfast progression.
- Update on Fastly evaluation and sponsorship.
- MacStadium Orka proposal.
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

## Action items:

| Date | Description | Status |
|------|-------------|--------|
|      | None        |        |

## Attendees

- ☒ George Adams
- ☐ Stewart Addison
- ☐ Carmen Delgado (guest)

- ☒ Tim Ellison
- ☒ Severin Gehwolf
- ☐ Shelley Lambert (apologies)
- ☒ Andrew Leonard
- ☒ San Hong Li
- ☒ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

## Meeting called to order at 14:04 BST

### Minutes:

- Approval of [minutes](#) from August 30th meeting.
  - Minutes of the previous meeting were approved.
- Review of outstanding actions.
  - None.
- Review of [GitHub issues flagged for PMC agenda](#).
  - None.
- Update on release of 11.0.20.1 and 17.0.8.1.
  - Completed.
- Update on migration of Adoptium API production service from OpenShift Online, including Digital Ocean k8s fallback.
  - GraphQL, V2 and jlink.online have been moved from OpenShift Online to Heroku.
  - We have also applied for Heroku credits to help cover the costs.
  - Only remaining service on OpenShift Online is the v3 AdoptOpenJDK API.
  - Need to determine how to get an SSL for the adoptopenjdk domain associated with the new service while still supporting the current.
  - LetsEncrypt will be a potential delay while we switch service, and we would expect some downtime on transfer.
  - Explored DigitalOcean as a fallback should our primary systems fail. Although underpowered it is only \$100/mnth at the moment.
  - Applied for CloudFlare to front the Adoptium requests. This could be used to balance and route requests appropriately. Likely require 'CloudFlare Workers' that come at a modest cost per month.
- Update on Fastly evaluation and sponsorship.
  - Applied for open source credits which have been granted.
  - This will be used to reduce workload on Artifactory.
  - Exploring with Fastly's development environment which is limited in bandwidth. Basic checks are working as expected, with caching proving useful.
  - Plan to move to production when the Fastly sponsorship is completed.
- MacStadium Orka proposal.
  - Nearing the deadline for their request to move to the Orka instance.

- Discussion about planning for a safe transition by running static machines and Orka in parallel.
  - ACTION: Andrew will double check with Haroon about the expectations about the images and tools we will have on Orka, and that the tools will work for Temurin build/test.
- Update on Steadfast progression.
  - Eclipse have signed the agreement with Steadfast to go ahead with the website design.
  - PMC invited to join the working group to contribute ideas and requirements.
- Update on GHSA-xrvg-mgj7-p5wh.
  - This issue was discussed and an update provided.
- AoB
  - None

**Meeting closed at 14:40 BST**
