

Adoptium

Project Management Committee

Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2024-November-27

Agenda:

- Approval of [minutes](#) of the November 13th meeting.
- Approval of [notice](#) for the November 20th meeting.
- Review of outstanding actions.
- Review of [GitHub issues flagged for PMC agenda](#)
 - use multistage build dockerfiles for JDK24+ ([containers#676](#))
 - chore(otterdog): adding / updating file(s) due to blueprint require-dependabot-auto-merge ([temurin-build#4033](#))
 - release branch approval is currently only 1 review, should it be 2 ? ([temurin-build#4047](#))
- Macstadium subscription
- Private build container image location - Windows and s390x. Also backup location for others (IBM would prefer ICCR)
- Intention to trial sigstore cosign with our build docker containers
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

Action items:

Date	Description	Status
	None	

Attendees

- ☐ George Adams
- ☒ Stewart Addison
- ☒ Carmen Delgado (guest)
- ☐ Tim Ellison (apologies)
- ☒ Scott Fryer
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ Andrew Leonard
- ☐ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☒ Lan Xia

Meeting called to order at 14:04 GMT

Minutes:

- Approval of [minutes](#) of the November 13th meeting. **Done!**
- Approval of [notice](#) for the November 20th meeting. **Done!**
- Review of outstanding actions.
- Review of [GitHub issues flagged for PMC agenda](#)
 - use multistage build dockerfiles for JDK24+ ([containers#676](#)) **No update this week**
 - chore(otterdog): adding / updating file(s) due to blueprint require-dependabot-auto-merge ([temurin-build#4033](#)) **No update from anyone present**
 - release branch approval is currently only 1 review, should it be 2 ? ([temurin-build#4047](#))
 - i. Default in otterdog is zero across projects. Adoptium overrides it to 1 for master branches. It was generally considered for the situation in the PR that since build/distribution needs to be as tightly controlled as possible that 2 would be preferable. We discussed setting the default to 2 across Adoptium instead of just doing it in the three build/distribution repositories which we branch, but it was considered unnecessary for most repositories (such as AQAvit) which are not directly part of the build/distribution process.
 - ii. We should look at having non-zero protection on non-master/main branches (or set defaults on templates)
- Macstadium subscription
 - Orka and other macstadium machines are not on the same account
 - Account mgr changed
- Private build container image location - Windows and s390x. Also backup location for others (IBM would prefer IBM Cloud Container Registry (icr.io) ICCR)

- <https://quay.io/plans/>
- Intention to trial sigstore cosign with our build docker containers
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB
 - Proposal for reproducible build verification/attestation for third parties.
 - i. Targeting January or April CPU
 - ii. Current proposal is for two organisations, other than EF, to be required to provide attestations and as worded it currently should be two that support Temurin binaries
 - iii. Public github issue as a subtask of Andrew's attestation epic will be used for discussion, to include [Carmen's presentation](#) that was shown.
 - Discussion on JEP493 and jlink issues
 - i. Severin's new PR is to remove the intermediate signing step for jdk24+ because we don't ship the relevant parts
 - ii. Potentially just need to remove the final signing step instead of the "internal" signing one - Andrew to follow up and investigate further, as this will also resolve the duplicate signature issue that we are seeing on Windows.
