 - Published about 20 platforms already. No major blockers as the compliance work continues. Release notes were published and will be updated on the expected schedule, which is once per week.
 - Temurin compliance work has been prioritised for the primary platforms, and the secondary are currently deferred.
 - i. Shelley reminded people that tests can be triggered to run externally, for review by the compliance team. This can be used for the AIX tests that are outstanding.

- ii. The delays in producing container descriptions for secondaries will delay the entire Dockerhub publish - due to the docker processes.
- AoB
 - There is a non-profit pricing for SpecJBB benchmark, and Shelley asked the PMC if we would be interested to include it as part of our perf runs
 - i. Shelley noted this would be of interest to the project. Currently evaluating the requirements from SPEC.
