

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

**Date:** 2025-August-13

## Agenda:

- Approval of [minutes](#) of the July 30th meeting.
- Approval for [statement](#) for the August 8th meeting.
- Review of outstanding actions.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
  - Define policies for jenkins job retention to ensure adequate disk space management ([infrastructure#3028](#))
  - July 2025 Release Status per Platform, Version & Binary Type ([temurin#89](#))
  - Completely removed support for Debian:buster ([installer#1220](#))
- Close out July CPU release
  - Checklist for Temurin Release July 2025 ([temurin#87](#))
  - Release Status per Platform, Version & Binary Type ([temurin#89](#))
  - General Retrospective for July 2025 Release ([temurin#84](#))
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

## Action items:

Date	Description	Status
2025-07-09	George will open an issue with the Eclipse Foundation Infrastructure team to request formal support on resolving the JFrog issues ( <a href="#">support#554</a> )	In progress

## Attendees

- ☐ George Adams
- ☒ Stewart Addison
- ☒ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Scott Fryer
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ Andrew Leonard
- ☒ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☐ Lan Xia

## Meeting called to order at 14:02 BST

### Minutes:

- Approval of [minutes](#) of the July 30th meeting.
  - Approved.
- Approval for [statement](#) for the August 8th meeting.
  - Approved.
- Review of outstanding actions.
  - Scott has been interacting with JFrog on this issue, and now cannot reproduce the problem. Noticed that there are fewer redirects for requests serving the binaries, which may help with the problem.
  - Sxa proposed to ask for examples from the community of new failures via the channel and issue, and this will be done via the issue and Slack channels.
  - We don't know if/what JFrog may have changed while working on this issue.
  - Should check that JFrog are aware that the use of SHA256 has been resolved.
  - Can drop this as an ongoing PMC action in future meetings.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
  - Define policies for jenkins job retention to ensure adequate disk space management ([infrastructure#3028](#))
    - i. Was discussed via Slack.
    - ii. AGREED to move to a 120-day artefact retention policy.
  - July 2025 Release Status per Platform, Version & Binary Type ([temurin#89](#))
    - i. Oracle produced a build for a later tag of JDK21 on Windows. Checking whether we wish to follow suit for Temurin?
    - ii. Severin explained that OpenJDK maintainers note that Oracle JDK sometimes do these for their own reasons, not always apparent why to the OpenJDK maintainers.

- iii. There is no plan to do a respin in OpenJDK, and Temurin would also not choose to do so.
- Completely removed support for Debian:buster ([installer#1220](#))
  - i. Have had a history of removing support for OS versions that go out of service. Changing the installer support is trivial.
  - ii. Issues tend to be around changing the base container image that we depend upon, and this varies by platform.
  - iii. Proposal is to align all build platform versions, and choose the lowest common denominator (likely to be RISC-V supported version).
  - iv. The list of published distro locations is here [https://github.com/adoptium/installer/blob/master/linux\\_new/Jenkinsfile#L23C1-L64C6](https://github.com/adoptium/installer/blob/master/linux_new/Jenkinsfile#L23C1-L64C6)
  - v. This needs to be rationalised. A sensible policy would be to remove end of life distros.
- Close out July CPU release
  - Checklist for Temurin Release July 2025 ([temurin#87](#))
  - Release Status per Platform, Version & Binary Type ([temurin#89](#))
  - General Retrospective for July 2025 Release ([temurin#84](#))
  - Almost everything is out.
  - JDK24 Win/aarch64 is not yet published due to testing issues found.
    - i. A fix is being worked upstream, so Temurin will skip this release and pick up the next JDKu.
    - ii. AIX issue cause also being tracked down.
    - iii. Not heard any demands from the community for these.
    - iv. Golfcard scores for this release show the impact of the change in personnel in the Compliance project. Expect to see improvements in the next update.
    - v. Start planning ahead of time for the onboarding of additional staff ahead of the September release.
    - vi. Thanks to Derek and Ava for their extraordinary support during this release!
- Update on GHSA-xrvg-mgj7-p5wh.
  - None
- AoB
  - None.
