 - Only waiting for Solaris and decided JDK17 win32 is not being released in this cycle. MSFT are aware.
 - Container images have been published. JDK25 Windows/aarch64 also not shipping on this release due to known historical issues.
 - Retrospective is underway.
- AoB
 - Jenkins purge regular build jobs “Config History” ?
 - i. Filter build-scripts/jobs/*
 - ii. Purge old history..
 - Performance on the Jenkins system may be impacted by the history plugin. The pipelines are being regenerated on PR merge, resulting in extensive history management.

- Can be more selective about the jobs that are maintained in history tracking, whilst keeping all the release job history.
- Also can purge old job history (XML files) that currently goes back three/four years. These can be kept in compressed archive backup should they be required in future.
- There are also some personal build pipelines for testing that can be cleaned up.
