

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2025-November-26

Agenda:

- Approval of [minutes](#) of the November 12th meeting.
- Approval of [statement](#) for the November 19th meeting.
- Review of outstanding actions.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
 - Error signing Windows installers built with jpackage ([adoptium-support#1244](#))
- October CPU release status note for Solaris
- Future of Solaris/SPARC and Solaris/x86_64 releases following removal of sponsorship for these platforms.
- Draft blog post regarding TCK handling.
- Container image naming conventions - request for input ([containers-853](#))
- AoB

Action items:

Date	Description	Status
	None	

Attendees

- ☐ George Adams
- ☒ Stewart Addison

- ☐ Carmen Delgado (guest)
- ☒ Tim Ellison
- ☒ Scott Fryer
- ☒ Severin Gehwolf
- ☐ Shelley Lambert (apologies)
- ☒ Andrew Leonard
- ☒ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☐ Lan Xia

Meeting called to order at 14:03 GMT

Minutes:

- Approval of [minutes](#) of the November 12th meeting.
 - Minutes were approved.
- Approval of [statement](#) for the November 19th meeting.
 - Statement was approved.
- Review of outstanding actions.
 - None
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
 - Error signing Windows installers built with jpackage ([adoptium-support#1244](#))
 - i. This problem has been around for a year or so. Most people haven't been impacted or notice this case.
 - ii. We were signing a binary stub used during packaging, the stub signature becomes invalid when combined with other code. We have removed the signature since it is not useful when combined with the linked data.
 - iii. DECISION: PMC agreed on a plan to remove the signature from the January release onwards.
 - iv. This affects multiple Java version releases.
- October CPU release status note for Solaris
 - Solaris releases have been published. No further October binaries expected now.
- Future of Solaris/SPARC and Solaris/x86_64 releases following removal of sponsorship for these platforms.
 - Dephix no longer requires this delivery, and have removed their sponsorship for the project to provide it.
 - This is the only major user that we are aware of, and note that it is expensive in terms of infrastructure and effort to keep them alive.
 - Propose to put out notification that this will be stopped, and check that nobody steps forward to sponsor it.

- Propose to build the January release code stream, but not compliance check it or release it. This is because we will want to keep machines available should a sponsor step forward - rather than tear them down then have to reinstate them again. Let's spend minimal effort ahead of a complete removal.
- Get a blog out asap to describe the position.
- The PMC also discussed the future of Windows 32-bit.
 - i. We don't test on any 32-bit machines/operating systems, and have encountered some test case failures when building with the latest Visual Studio versions.
 - ii. Combine both into one blog post, and refer people to separate issues for each (SOLARIS/Win32) to allow for distinct comments.
- Draft blog post regarding TCK handling.
 - PMC are encouraged to read the draft blog post and add comments as appropriate.
- Container image naming conventions - request for input ([containers-853](#))
 - PMC are also encouraged to provide feedback on how the images are named.
- AoB
 - None
