Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2025-October-08

Agenda:
- Approval of minutes of the September 24th meeting.
- Approval of minutes of the October 1st meeting.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
  - September 2025 Release Status per Platform, Version & Binary Type (temurin#96)
    - i. Discuss comment by Joost den Boer regarding removal of Temurin with UBI9 base image publication on Docker.
  - MAC JDK/JRE tar.gz package fails to run when period is missing in the folder name. (temurin-build#4262)
- AoB

Action items:

Date	Description	Status
2025-09-17	ACTION: Scott will figure out how the build environment needs to change to provide Linux man pages in the build. Will check on reproducible build implications (temurin-build#4150)	In Progress

Attendees
- ☐ George Adams

- ☑ Stewart Addison
- ☑ Carmen Delgardo (guest)
- ☑ Tim Ellison
- ☑ Scott Fryer
- ☑ Severin Gehwolf
- ☑ Shelley Lambert
- ☑ Andrew Leonard
- ☐ San Hong Li (apologies)
- ☐ John Oliver
- ☐ Martijn Verburg
- ☐ Lan Xia

Meeting called to order at 14:03 BST

Minutes:
- Approval of [minutes](#) of the September 24th meeting.
  - Minutes were approved.
- Approval of [minutes](#) of the October 1st meeting.
  - Statement was approved.
- Review of outstanding actions.
  - Scott still working on the man pages build environment.
  - Can install a statically linked set, or bump the base OS for a build which would be a longer term item.
  - So close to the October CPU so reluctant to make build system changes at this point.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
  - September 2025 Release Status per Platform, Version & Binary Type ([temurin#96](#))
    - Discuss [comment](#) by Joost den Boer regarding removal of Temurin with UBI9 base image publication on Docker.
    - Temurin images have been updated to use UBI10, however, as the user has pointed out UBI10 does not work on x86-64-v2 hardware.
    - Ubuntu is available for this CPU configuration, but UBI10 would be the only rpm-based image.
    - Unclear why the user is not following the blog instructions to move onto a base image of choice.
    - Should have been noted in the release notes. Can do so retrospectively.
  - MAC JDK/JRE tar.gz package fails to run when period is missing in the folder name. ([temurin-build#4262](#))
    - Codesigning treats a folder name with a period specially, and once it has been installed the problem self-resolves.
    - Unclear why macOS has this behavior.

- - - Can choose a new name to workaround this limitation, e.g. add ".jdk" or call the initial GA release "*.0.0".
    - Andrew will look at the impact of changing the directory name across all platforms.
- AoB
  - Carmen reminded the PMC that the [2026 program plan](#) is underway, and welcomes the PMC input.
    - Shelley noted that increasing the capacity in infrastructure is a key area for accelerating the productivity of the project.
  - Marketplace is still not working as expected. Will flag to the website channel to look into it.
  - Do we have a plan to include fastdebug builds?
    - Current infrastructure does not support this additional build.
    - Have not specified what additional resources would be required.
    - Also considered as part of the Project Trestle deliveries/capabilities.
      - Ability to build from branches has been restored, so progress can be made.
      - Good candidate for use of the dynamic agents.
    - Would impact members on relying on this infra for upstream OpenJDK maintenance.

Meeting closed at 14:42 BST
