Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2024-November-13

Agenda:
- Approval of minutes of the October 30th meeting.
- Approval of statement for the November 6th meeting.
- Review of outstanding actions.
- Review of GitHub issues flagged for PMC agenda
  - use multistage build dockerfiles for JDK24+ (containers#676)
  - Fedora 41 rpm (installer#1046)
  - chore(otterdog): adding / updating file(s) due to blueprint require-dependabot-auto-merge (temurin-build#4033)
  - [JDK 24] Enable JEP 493 in Temurin 24 builds (temurin-build#4035)
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

Action items:

Date	Description	Status
	None	

Attendees
- ☑ George Adams
- ☑ Stewart Addison
- ☐ Carmen Delgardo (guest)

☑ Tim Ellison

☑ Scott Fryer

☑ Severin Gehwolf

☑ Shelley Lambert

☑ Andrew Leonard

☑ San Hong Li

☑ John Oliver

☐ Martijn Verburg

☑ Lan Xia

Meeting called to order at 14:03 GMT

Minutes:
- Approval of [minutes](#) of the October 30th meeting.
  - Minutes were approved.
- Approval of [statement](#) for the November 6th meeting.
  - The statement was approved.
- Review of outstanding actions.
  - None.
- Review of [GitHub issues flagged for PMC agenda](#)
  - use multistage build dockerfiles for JDK24+ ([containers#676](#))
    i. This can be kept on the agenda.
    ii. No updates this week.
  - Fedora 41 rpm ([installer#1046](#))
    i. Folders are not yet symlinked, and the directory is not yet created for this version.
    ii. Would need to be explicitly added until the refactoring of the repo is underway.
    iii. Scott will create the path and push the October release only until the refactor. This is a work around until the symlinking refactor work is done.
    iv. The refactor would likely include a general version linked from specific paths. Scott will share the design with the PMC when ready.
    v. Work is being undertaken via the epic for installers rework : https://github.com/adoptium/installer/issues/1005 and Development Jenkins pipeline : https://ci.adoptium.net/job/sfr-build-linux-package-modular/
  - chore(otterdog): adding / updating file(s) due to blueprint require-dependabot-auto-merge ([temurin-build#4033](#))
    i. Common GitHub actions code in Adoptium are under ALv2.
    ii. Otterdog can create templated files for automating the creation of the files. It has created files that don't have the source file headers expected.
    iii. Request that the templates are updated to include the licence.

- ○ [JDK 24] Enable JEP 493 in Temurin 24 builds ([temurin-build#4035](#))
  - i. JEP 493 introduces a build option to not include jmods in the runtime. It will be off by default.
  - ii. This proposal is to turn it on for Temurin builds in order to take advantage of the download size reduction. We would expect JMODs to be available as a different artifact.
  - iii. No indication if other vendors are going to have linkable runtimes enabled by default.
  - iv. Would need to pass AQAvit and JCK tests to be distributed.
  - v. Discussion of waiting to see if the JMODs should be available as a separate download proactively, or whether we wait to see if there is user demand.
  - vi. PMC agreed to change the build from 24 onwards to adapt to the linkable runtimes, check notarisation, etc, and test the results. The separate JMODs will be deferred until user demand is found. A blog will be written to invite this.
- Update on GHSA-xrvg-mgj7-p5wh.
  - ○ Work continues on edge case found during testing.
- AoB
  - ○ Lan explained that auto-rerun will be introduced for failed tests.
    - i. This will improve stability for the jobs that are failing via Jenkins, to work around temporary issues. These will be limited to a configured number of re-runs.
    - ii. This extends the re-runs from just "Unstable" tests to both "Unstable" and "Failed" tests.
    - iii. TRSS will show that the test was subjected to a re-run.
    - iv. When machines fail in certain ways they will automatically be marked off-line with notifications on the Jenkins node description and sent via Slack.
  - ○ Shelley is adjusting the project leads for AQAvit to include Lan, Sophia, and Longyu. This will require some interaction with the EF Office.
    - i. This is not reducing committer rights, rather recognising the leadership of the project.
  - ○ sxa explained there will be a change in Fedora 42 to include a transition package that will help users pick up Temurin rather than distribute their own builds.
    - i. This is understood to be a link to the existing Adoptium packages.
  - ○ George noted that we have a full month of data from CloudFlare showing where we see users coming to the DNS.
