Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2024-March-27

Agenda:
- Approval of minutes of the previous meeting.
- Review of outstanding actions.
- Review of GitHub issues flagged for PMC agenda.
- JDK22.0.0 build 36 release status (temurin#35)
- Temurin project progress review by Eclipse EMO (gitlab#707)
- PMC membership vote : Scott Fryer
  - Process via EF handbook, e-mail sent to adoptium-pmc mailing list. RSVP.
- Equinix x64 system removal.
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB
  - Status on RH QE team into temurin-compliance?

Action items:

Date	Description	Status
24-Jan-2024	ACTION: gdams to discuss with JFrog how to use symlinks in Artifactory. Trial this with the 'Rocky 9' to 'Rocky 8' installer path with a view to further roll-out. (ref installer#801)	In progress
06-Mar-2024	ACTION: Lan will open an issue capturing an agreement between OpenJ9 and Adoptium projects to move system tests from OpenJ9 to AQAvit.	Completed

Attendees

- ☐ George Adams
- ☑ Stewart Addison
- ☑ Carmen Delgardo (guest)
- ☑ Tim Ellison
- ☑ Severin Gehwolf
- ☑ Shelley Lambert
- ☐ Andrew Leonard
- ☑ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☐ Lan Xia (apologies)

Meeting called to order at 14:03 GMT

Minutes:
- Approval of minutes of the previous meeting.
  - Minutes were approved.
- Review of outstanding actions.
  - No further contact from JFrog.
  - Lan has raised the issue for moving tests from OpenJ9 to AQAvit. (https://github.com/adoptium/aqa-tests/issues/5163)
- Review of GitHub issues flagged for PMC agenda.
  - add license checker GH action (temurin-build#3721)
    - i. A GitHub action already exists to enforce source file headers, and will update legacy files if required.
    - ii. Currently we are seeking clarification about the nature of the copyright header with the EMO.
    - iii. This action has been successfully trialled with the temurin-build repository to check that it works as expected. Once it is stable we will roll out to others and inform developers of the source file header requirements on commit.
    - iv. The PMC are encouraged to review and assess the tool and give comments on the process change.
- JDK22.0.0 build 36 release status (temurin#35)
  - The release is completed for all platforms except PPC AIX, s390x Linux, and RISCV Linux, which are all delayed due to implementation issues in OpenJDK rather than Temurin release management.
  - The PMC agreed to declare the initial JDK22 release completed, and wait for the other platforms to catch-up which may be at the April CPU update.
  - Discussion about the platform leads' requirements to keep implementations ready for release in OpenJDK, and how we can help provide feedback.

i. This predominantly requires people to help triage issues found at Adoptium in time, and this should be passed back to platform leads as an opportunity for early notification.
  - Will update the Dockerfiles to go live without the platforms that are unavailable.
  - Draft blog posts for the releases and RISCV new availability are in progress.
- Temurin project progress review by Eclipse EMO (gitlab#707)
  - No updates this week.
  - Current status in the gitlab issue.
- PMC membership vote : Scott Fryer
  - Process via EF handbook e-mail sent to adoptium-pmc mailing list. RSVP.
  - Vote is underway.
- Equinix x64 system removal.
  - Still in progress with Solaris and AIX outstanding platforms to be handled.
  - Progressing as expected.
- Update on GHSA-xrvg-mgj7-p5wh.
  - Nothing this week.
- AoB
  - Status on RH QE team into temurin-compliance?
    i. Further members have been added to help in the temurin-complaince project. These are experienced developers from the Red Hat quality engineering (RHQE) team and their involvement is welcomed at Temurin.
  - Discussion of Midnight Blizzard in the media. EF may be a target in this realm so need to be mindful. This would include 2FA for access, minimal rights, etc.
    i. The PMC are reminded to ensure that security and secure access remains a high priority at the project.

Meeting closed at 14:32 GMT
