Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2025-May-21

Agenda:
- Approval of minutes of the May 14th meeting.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
  - Linux Installers: Backport Installation Location Changes For RPMS for SELinux (installer#1171)
  - Add Ubuntu 25.04 Plucky Puffin (installer#1182)
  - Proposal: ubi10-minimal Support (containers#769)
  - Support of Microsoft Windows Server 2025 (adoptium-support#1193)
- New website update.
- User problems reported accessing https://packages.adoptium.net
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

Action items:

Date	Description	Status
	None	

Attendees

- ☑ George Adams
- ☐ Stewart Addison (apologies)
- ☐ Carmen Delgardo (guest)
- ☑ Tim Ellison
- ☑ Scott Fryer
- ☐ Severin Gehwolf (apologies)
- ☐ Shelley Lambert (apologies)
- ☑ Andrew Leonard
- ☐ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☑ Lan Xia

Meeting called to order at 14:02 BST

Minutes:
- Approval of minutes of the May 14th meeting.
  - Deferred until meeting is quorate.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
  - Linux Installers: Backport Installation Location Changes For RPMS for SELinux (installer#1171)
    - i. Requires additional testing on versions other than JDK8.
    - ii. Will create a blog post for sharing the changes.
    - iii. Can be removed from future PMC agenda items.
  - Add Ubuntu 25.04 Plucky Puffin (installer#1182)
    - i. Discussion of our policy for pushing packages for short term supported OS releases.
    - ii. This would require testing to determine that the version works for Temurin.
    - iii. Similar situation for RHEL10 that should be pushed.
    - iv. Continue discussion in Slack, and try to remember the project policy. The effort is infra and testing, not packaging implementation.
  - Proposal: ubi10-minimal Support (containers#769)
    - i. This is the next LTS release for ubi10.
    - ii. Discussion about whether we should remove ubi9 from future Temurin version releases. Decided that would be appropriate.
    - iii. Using ubi10 in an official image will require the upstream Docker team to flag this as a safe image.
    - iv. ACTION: George will follow up with the raiser of containers#769 to explain the path forward for support of UBI10 base image.

- - Support of Microsoft Windows Server 2025 ([adoptium-support#1193](#))
    - i. Handled in previous PMC call. Can remove the tag.
- New website update.
  - The new website is live for approx. 25% of visitors, via the load balancer.
    - i. Users served the old site can choose to look at the new site via a button on the header. There is a similar button coming to revert users of the new site back to the old site in case of issues.
  - George gave the PMC a quick walkthrough of the new site layout.
  - PMC are encouraged to try it out and give feedback.
  - Switching from Bootstrap to Tailwind has been a successful decision. Tooling helps to enhance the Tailwind site.
  - At some point we should consider moving from Gatsby to NextJS. Would require additional work.
- User problems reported accessing https://packages.adoptium.net
  - Access via the adoptium.jfrog site seems to be reliable, whereas going via packages.adoptium can exhibit intermittent problems.
  - Attempts to raise this with JFrog have not been successful.
  - While we have advised users of the workaround, that will bypass the Fastly CDN, which is taking a heavy load from JFrog.
  - Discussion of the options for a back-up store replicated in a blob store.
- Update on GHSA-xrvg-mgj7-p5wh.
  - PR has been made available to help with progression.
- AoB
  - None
- Quorum was not met at this meeting. No binding decisions were made.

Meeting closed at 14:31 BST
