# Adoptium
# Project Management Committee
# Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

---

**Date:** 2023-November-29

**Agenda:**
- Approval of minutes from November 22nd meeting.
- Review of outstanding actions.
- Review of GitHub issues flagged for PMC agenda.
  - Status of arm32 support in Temurin (adoptium-support#962)
- ORKA update.
- Equinix x64 system removal.
- Update on GHSA-xrvg-mgj7-p5wh.
- AoB

**Action items:**

| Date | Description | Status |
|------|-------------|--------|
|      |             |        |

**Attendees**
- ☑ George Adams
- ☑ Stewart Addison
- ☑ Carmen Delgardo (guest)
- ☑ Tim Ellison
- ☑ Severin Gehwolf
- ☑ Shelley Lambert

☑ Andrew Leonard

☐ San Hong Li (apologies)

☐ John Oliver

☐ Martijn Verburg

☐ Lan Xia

## Meeting called to order at 14:03 GMT

## Minutes:
- Approval of [minutes](#) from November 22nd meeting.
  - Minutes of the meeting were approved.
- Review of outstanding actions.
  - None
- Review of [GitHub issues flagged for PMC agenda](#).
  - Status of arm32 support in Temurin ([adoptium-support#962](#))
  - Arm32 is not in a position to be released due to failures in compatibility testing. We will release it if this is resolved upstream.
  - The raiser is looking for a definitive statement of direction for a 32-bit Arm binary, allowing users to make plans rather than wondering if it will happen.
  - OpenJDK considers this an unsupported platform, so Temurin cannot promise it will be provided. The code is in mainstream OpenJDK.
  - Unlikely to get a clear statement from OpenJDK about its support or deprecations so may need to unilaterally remove it.
  - If we do not get the appropriate confirmation of platform support upstream then we plan to provide such a statement following giving notice to the WG SC of the plan to state the end of arm32 Temurin since it is not strategically maintained at OpenJDK.
- ORKA update.
  - Up and running and individual (non-ORKA) machines are being shut down.
  - Checking that all is working as expected.
  - Noticing that there is a loss of connection to VMs, causing cascading failures.
  - May require a ticket with the provider.
- Equinix x64 system removal
  - We have been notified of an intention to remove this sponsorship from the project.
  - Need to work on a migration plan to go onto a new provider.
  - This should also be brought to the attention of the WG SC.
- Update on GHSA-xrvg-mgj7-p5wh.
  - Work is progressing.
- AoB
  - Website redesign and implementation is progressing well.
  - Have received updated text for interim builds and will update the relevant areas of the project as directed by EF.
  - Discussion about proceeding with the use of the Nine Co-lo equipment.
  - Security audit has kicked-off.

**Meeting closed at 14:53 GMT**
