Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2026-11-04

Agenda:

- Approval of minutes from the October 28, 2026 meeting.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
    - [Should|can] we add CPE and/or PURL into SBoM components?#3653
    - Change Automated CA-CERTS Updater To Use NSS Branch #4585
    - Ansible request for VS2022 17.14 on Windows to fix JDK17 gtest C2244 #4557
- Review of EF security vulnerability-reports (please see note in Slack channel regarding how to change notification settings for your profile)
- Ending AWS Infrastructure contract (sfryer)
- Ending MacStadium/Orka contract (sfryer)
- October release update
    - x64 Windows on JDK 27 pending
    -
- AoB
    - AIX nodes for TC
        i. *Can likely reallocate OSUOSL systems to TC at least in the interim to resolve the current blockers - sxa*
    -

Action items:

Date	Description	Status

None	Shelley to update security teams on all projects and sub-projects to be the PMC members.	TBD
	Shelley to check how to receive updates from gitlab	Completed

Attendees

- ☑ George Adams
- ☑ Stewart Addison
- ☑ Scott Fryer
- ☑ Severin Gehwolf
- ☑ Shelley Lambert
- ☐ Andrew Leonard
- ☐ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☐ Tim Ellison

Minutes:

Meeting start: 14:04

- Minutes from the October 28, 2026 meeting are approved.
- Review of outstanding actions. 1 completed action, 1 still to be done.
- Review of GitHub issues and discussions flagged for PMC agenda
    - [Should|can] we add CPE and/or PURL into SBoM components?#3653 - kept as a reminder
    - Change Automated CA-CERTS Updater To Use NSS Branch #4585 - a PR is being prepared by Andrew
    - Ansible request for VS2022 17.14 on Windows to fix JDK17 gtest C2244 #4557 - In theory, no issue to update, caveat that testing to ensure it doesn't break reproducibility and an invitation for the raiser of the issue to take on creating a PR for testing
- Review of EF security vulnerability-reports
    - please see note in Slack channel regarding how to change notification settings for your profile, no new reports have been filed since last week.
- Ending AWS Infrastructure contract (sfryer)
    - Will end this contract for now as there are other servers that can cover the ones provided here. May want to revisit next year, as AWS now provides Macs (and they may be cheaper than MacStadium)
- Ending MacStadium/Orka contract (sfryer)

    - Look at options to reduce but not end the contract with the following actions, trial shifing testing onto GHA nodes, keep 3 Macstadium nodes to run builds on. This would temporarily affect our L3 SLSA standing at losing ephemeral builds on dynamic Orka agents, but we can explore native hypervisor on macOS for achieving ephemeral builds and restating L3. Scott to speak with Denis Roy from EF infra regarding options and pricing.
- October release update
    - x64 Windows on JDK 27 pending
    - Some JDK 8 and 11 going out today, hope to complete by the end of the week, need active eyes in the TC project. George to provide cycles.
- AoB
    - AIX nodes for TC
        i. As there are none currently available in the TC project, can likely reallocate OSUOSL systems to TC at least in the interim to resolve the current blockers - Scott to explore
    - Brief discussion on other node availability for TC project, for discussion with EF infra in an upcoming regularly scheduled meeting with them.

Meeting end: 14:41
