Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2026-10-21

Agenda:

- Approval of minutes or statements from the Oct 14, 2026 meeting.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
    - openSUSE 16 not supported by RPM repository
    - Change Automated CA-CERTS Updater To Use NSS Branch
- Review of EF security vulnerability-reports (list not intentionally public reports)
- October release update
    - eMudhra Intermediate CA compromise
- AoB
    - Q3 activity report: https://github.com/adoptium/adoptium/issues/359#issuecomment-6147595125

Action items:

Date	Description	Status
	Shelley to update security teams on all projects and sub-projects to be the PMC members.	TBD

Attendees

- ☐ George Adams

- [x] Stewart Addison
- [x] Scott Fryer
- [x] Severin Gehwolf
- [x] Shelley Lambert
- [x] Andrew Leonard
- [x] San Hong Li
- [ ] John Oliver
- [ ] Martijn Verburg
- [ ] Tim Ellison

Minutes:

Meeting start: 14:07

- Minutes from the Oct 14, 2026 meeting are approved
- Review of outstanding actions. 1 owned by Shelley, not started.
- Review of GitHub issues and discussions flagged for PMC agenda
    - Change Automated CA-CERTS Updater To Use NSS Branch
        i. Discussion to use latest release to production (RTM),
        ii. Severin has posted a link to release 3.131.1 to use the right set for October, https://hg-edge.mozilla.org/projects/nss/rev/NSS_3_131_1_RTM, Andrew will create a PR to use it and retrigger the pipelines
    - openSUSE 16 not supported by RPM repository
        i. openSUSE_15x went end of life in April 2026, question of whether to deprecate or continue delivering. Either approach is possible, but the SUSE repos are becoming less stable. However the change to openSUSE 16 is not a small change. Confirm whether 15 have extended support
            1. Option 1 - 15 is EOL, hard switch to 16
            2. Option 2 - softer transition plan, support both and drop 15 at some point in the future (define a point and don't let it linger)
        ii. Create a blog post to communicate. See about looking at Artifactory download metrics.
- Review of EF security vulnerability-reports (list not intentionally public reports)
- October release update
    - eMudhra Intermediate CA compromise - see notes above, 1) immediate/temp to move October forward is to point at the hg-egde.mozilla.org link to pick up correct set 2) Going forward, use latest 'release to production' (RTM) instead of 'release' (which can lag weeks behind rtm).
    - Changes to mirror for JDK27
    - Andrew is release manager. Will abort all current pipelines, create/merge PR for certs change and re-launch.

- AoB
    - Security scanning with Grype being added to Installer pipelines, insert EPIC link here
    - Q3 activity report: https://github.com/adoptium/adoptium/issues/359#issuecomment-6147595125
    - Stewart asked if anyone else besides he and George have access/info re: Fastly. No one in this meeting did.

Meeting end: 14:45
