

# Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

---

**Date:** 2026-Sept-02

## Agenda:

- Approval of [minutes](#) or statements from the August 26, 2026 meeting.
- Review of outstanding actions.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
- Review of EF security [vulnerability-reports](#)
- August CSPU update
- AoB

○

## Action items:

| Date         | Description                                                                                                                           | Status |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------|--------|
| Aug 26, 2026 | Shelley to find out how EF security vulnerabilities are assigned.                                                                     | To Do  |
| Aug 26, 2026 | Shelley to take a look at the project leads list and start ‘cleaning the lists’ up by inviting non-active folks to retire themselves. | To Do  |

## Attendees

- ☒ George Adams
- ☒ Stewart Addison

- ☒ Scott Fryer
- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ Andrew Leonard
- ☒ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☐ Tim Ellison

## Minutes:

Meeting start: 14:02

- The [minutes](#) from the August 26, 2026 meeting are approved.
- Review of outstanding actions.
  - Still in progress
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
  - No new ones in the list
- Review of EF security [vulnerability-reports](#)
  - Thanks Severin for closing the 'workflow' one in the temurin repo.
  - Others still to be addressed. Shelley has assessed the aqa-tests ones, none of them are mission critical, but will be addressed one by one after Aug release completes.
- August CSPU update
  - One last platform is still under test triage (Jdk8 arm32 linux), it is holding up the containers from shipping
  - Decision from PMC to remove JDK8 arm32 Linux from the 'latest' tag so it does not hold up the containers from shipping. George will respond to Tianon from the Dockerhub team who was asking about this topic.
  - Brief chat about Temurin Compliance staffing and resiliency plan that was shared with PMC a few months ago. Likely to schedule a meeting with EF security team to revisit some of the items in the resiliency plan (to ensure everyone is on-board and it can be progressed).
- AoB
  - Question from Peter Shipton / will we still be shipping x64 Mac? Answer from PMC, no, plan to drop it as of JDK27 (Sept 2026)
    - i. Reason 1: No company is owning the upstream port from JDK 28 forward.
    - ii. Reason 2: Less access to hardware
    - iii. Consider dropping for other versions in the future

Meeting end: 14:28
