

Adoptium

Project Management Committee

Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2026-08-12

Agenda:

- Approval of [minutes](#) or statements from the Month Day meeting.
 - Review of outstanding actions.
 - Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
 - July release update
 - Prepare for August CSPU
 - Committer support workflows in Adoptium repo
 - AoB
-

Action items:

Date	Description	Status
None		

Attendees

- ☐ George Adams
- ☒ Stewart Addison
- ☒ Scott Fryer
- ☒ Severin Gehwolf
- ☒ Shelley Lambert

- ☒ Andrew Leonard
- ☒ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☐ Tim Ellison

Minutes:

Meeting start: 14:05

- Approval of [minutes](#) from July 15, 2026 and statements from the July 22 and 29, 2026 where meetings were skipped or informal discussions held due to not meeting quorum.
- Review of outstanding actions.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
 - <https://github.com/adoptium/installer/issues/1439> - Add Oracle Linux 9 & 10 support. Scott will proceed with this, no objections from PMC.
- July release update
 - Scorecards have improved. We are now back to July 2025 'golf scores'.
 - Since we decoupled build and test (a large change in how pipelines operate), we had a few glitches to work through but it did not seriously impact our release. Those have been addressed and expect improvements for August and future releases.
- Prepare for August CSPU
 - Updated doc for how to create mirrors for Temurin
 - Release champion : Shelley
 - aqa-tests branch will be created and base off of July branch
- Committer support workflows in Adoptium repo
 - 7 agentic workflows created. 3 referenced in this meeting:
 - i. Quarterly impact report (to be reviewed quarterly by PMC)
 - ii. FAQ review - example: , looks at many social channels including Slack and support repos to see what questions are being asked about our project. Can generate a PR to update FAQ, but generally can be used to stay aware of trending questions.
 - iii. Draft release blog post - example: <https://github.com/adoptium/adoptium/issues/330> looks at open adoptium.net issue, past release blog posts and github repos to generate content for draft PR
- AOB
 - Pipeline refactor work
 - i. Andrew to host mtg to review large PR
 - ii. Once merged, start testing on current Jenkins
 - iii. Incorporate the next pieces of implementation that are not yet done.
 - iv. Plan to trial it for October release, on x64 Linux for 1 or more versions

- Several security / vulnerability tickets raised by the EF security team. EF considers project leads as the security team that should be dealing with these AI generated reports, which means its on the project leads to determine if the report is correct and what actions need to be taken to mitigate. ACTION: Shelley to review the list of security tickets raised and bring to next PMC mtg.

Meeting end: 14:42
