

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2026-05-27

Agenda:

- Approval of [minutes](#) from the May 13, 2026 meeting.
- Review of outstanding actions.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
- Proposal on refactoring/simplification of build pipelines from Andrew L.
- AoB

○

Action items:

Date	Description	Status
May 6, 2026	Shelley to pull together an agentic workflow to support PMC activities, including review/celebrate quarterly contributions. Shift this to the Semesters of Code team	In progress

Attendees

- ☒ George Adams
- ☒ Stewart Addison
- ☐ Scott Fryer

- ☒ Severin Gehwolf
- ☒ Shelley Lambert
- ☒ Andrew Leonard
- ☐ San Hong Li
- ☒ John Oliver
- ☐ Martijn Verburg
- ☐ Tim Ellison

Minutes:

Meeting Started 14:02

Agenda:

- The [minutes](#) from the May 13, 2026 meeting are approved.
- Review of outstanding actions, one owned by Shelley, will become a TODO for Semesters of Code student team.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda (the 1 issue of discussion is the next full topic on the agenda, <https://github.com/adoptium/ci-jenkins-pipelines/issues/1396>)
- Proposal on refactoring/simplification of build pipelines from Andrew L.
 - Presentation from Andrew on refactor work, documents and prototype can be seen in these repos for now:
 - i. https://github.com/andrew-m-leonard/ci-adoptium-pipelines/blob/main/docs/CI_AGNOSTIC_ARCHITECTURE.md
 - ii. <https://github.com/andrew-m-leonard/ci-adoptium-pipelines/blob/main/docs/README.md>
 - Discussion followed, emphasizing the portability and other benefits, ability to run and test stages locally, etc
 - No objection to proceeding with the approach Andrew is taking (1 version/platform, x64 Linux) to start with, running alongside the existing pipelines, doing reproducibility verification as one measure of 'success'. He will then proceed with the other primary platforms (2 stage windows and mac), then flesh out the entire build matrix upon satisfactory outcomes of the initial trials. All the while keeping our existing pipelines functional, so as not to disrupt the project.
 - Rework of test pipelines will also follow, but for the sake of attention, short on human resources, and such, we will do this in a later time frame.
- AoB
 - Jenkins server work (Andrew and Stewart looking at config arguments and will adjust some to see how it affects server stability, see related issue: <https://github.com/adoptium/infrastructure/issues/4364>)
 - Add Temurin Compliancy Resiliency Plan to next agenda

Meeting Ended 14:46
