Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2026-09-23

Agenda:

- Sept 16, 2026 meeting was cancelled, no minutes to review.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
    - Remove full version from product name details
    - Pebble binary unexpectedly present in eclipse-temurin:25-jre-resolute image
    - [Should|can] we add CPE and/or PURL into SBoM components?
    - Discussion: Replacement Jenkins Server
    - Proposal: Drop macOS x64 binaries for JDK 27
    - jdk28 x64 Mac builds need --enable-deprecated-ports to build
    - Proposal: Ubuntu 24.04 Support
- Review of EF security vulnerability-reports
- August containers stalled on https://github.com/docker-library/official-images/pull/22239#issuecomment-5736464434
- Sept JDK 27 release update
- Review Maintainers.md file created for the OpenSSF review shows 'clean-up' is needed.
- Add Scott Fryer as an administrator for the AdoptOpenJDK team lists, as those are how we manage access to the Jenkins server. We can create a poll for this.
- Move AIX, s390x Linux, ppc64le Linux platforms to headless by October CPU (re: https://adoptium.net/news/2026/05/headless-platform-changes)
-
- AoB

- Adoptium Summit Sept 29th, good line-up of talks for the half-day virtual event

Action items:

Date	Description	Status
Aug 26, 2026	Shelley to find out how EF security vulnerabilities are assigned. This is an automated process that is being 'tested out' by EF security. Their automation made assumptions about how all projects structure their orgs, and in some cases it caused all committers from all projects under the adoptium organization to be assigned. Helpdesk ticket raised by Shelley L. to address it.	Completed
Aug 26, 2026	Shelley to take a look at the project leads list and start 'cleaning the lists' up by inviting non-active folks to retire themselves.	To Do

Attendees

- ☐ George Adams
- ☑ Stewart Addison
- ☑ Scott Fryer
- ☑ Severin Gehwolf
- ☑ Shelley Lambert
- ☑ Andrew Leonard
- ☐ San Hong Li
- ☐ John Oliver
- ☐ Martijn Verburg
- ☐ Tim Ellison

Minutes:

Meeting start: 14:06

- Sept 16, 2026 meeting was cancelled, no minutes to review.
- Review of outstanding actions.
    - Advisories were assigned incorrectly as the EF Security automation made assumptions about how we structure our GitHub organizations (which meant all committer teams in all repos/projects under the Adoptium GitHub organization were assigned to advisories against a single project). A

helpdesk ticket was raised and they will fix their automation. Add ticket link here: https://gitlab.eclipse.org/eclipsefdn/helpdesk/-/work_items/7882

- Review of GitHub issues and discussions flagged for PMC agenda
  - Remove full version from product name detail - no objection from PMC to make the changes as discussed in the issue
  - Pebble binary unexpectedly present in eclipse-temurin:25-jre-resolute image - Add a note stating that we will not endeavour to change base images. Recommend taking it to Canonical and/or building their own image as per their specific requirements.
  - [Should|can] we add CPE and/or PURL into SBoM components? - leave this tagged with PMC-agenda so it doesn't slip through the cracks
  - Discussion: Replacement Jenkins Server - remove PMC-agenda label
  - Proposal: Drop macOS x64 binaries for JDK 27 - done, remove PMC-agenda label
  - jdk28 x64 Mac builds need --enable-deprecated-ports to build - done, remove PMC-agenda label
  - Proposal: Ubuntu 24.04 Support - done, remove PMC-agenda label
- Review of EF security vulnerability-reports
- August containers stalled on https://github.com/docker-library/official-images/pull/22239#issuecomment-5736464434 - tagged George to assist in making the changes
- Sept JDK 27 release update
  - AIX, aarch64 and x64 Windows, and ppc64le Linux remain - should be completed this week. Windows blocked on SSH plugin downgrade needed.
- Review Maintainers.md file created for the OpenSSF review shows 'clean-up' is needed. - Shelley to share a link to this doc in the Slack channel, and we can propose changes to remove inactive maintainers.
- Add Scott Fryer as an administrator for the AdoptOpenJDK team lists, as those are how we manage access to the Jenkins server. Shelley will create a poll for this.
- Move AIX, s390x Linux, ppc64le Linux platforms to headless by October CPU (re: https://adoptium.net/news/2026/05/headless-platform-changes). - Having checked with as many stakeholders as are known, we can put one more push out to the social channels referencing the May blog post, to let people know that we will shift to headless builds in time for the October CPU.
- AoB
  - Adoptium Summit Sept 29th, good line-up of talks for the half-day virtual event

Meeting end: 14:34
