Minutes:

Meeting Started 14:03

- The [minutes](#) from the May 6, 2026 Day meeting were approved.
- Review of outstanding actions.
 - https://github.com/adoptium/containers/blob/main/DISTRO_MAINTENANCE.md added.
 - Andrew will plan to present on the build pipeline refactoring and simplification next week.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
 - No new issues, the reduce the size of the container matrix issue will have the label lifted now that documentation on criteria for adding new containers is completed.
- Solaris/Win 32bit download visibility on website
 - Full agreement on removing these platforms from the latest releases pages
- Release status update and discussion
 - Still 2 platforms left to publish, delays waiting for EF infra to attend to recurring issues (mac and windows). Frustration expressed from Temurin Compliance (TC) committers. Scott will connect with TC committers and EF infra to get info and see how he can advise/assist on infra configuration suggestions.
- AoB
 - Scott closed off copy-fail work (infra patches), dealing with a new item that needs patching.
 - Still need to update otterdog to block changes to a PR after a review has occurred, Andrew to find the related issue.
 - George has applied some agents to the packaging work and has some suggestions for improvements that will be shared in an issue.

- MSFT reorganisation puts some folks reporting to George, and he will look to help alleviate some pain points at the project
- Shelley mentions she will be presenting to Accenture later today and letting them know of various ways they can support the project. Also meeting with EF to answer a few more questions relating to the legal review of the icon that we want to put on the download page of the website as part of a CycloneDX attestation that 3rd parties can make when participating in the Reproducible Verification program.
