

Adoptium Project Management Committee Agenda & Minutes

“The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project’s charter.” [\[ref\]](#)

Date: 2026-August-26

Agenda:

- Approval of [minutes](#) or statements from the August 12th and 19th, 2026 meetings.
- Review of outstanding actions.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
- August CSPU update
- EF security tickets (find PMC members to own / bring to resolution)
 - <https://gitlab.eclipse.org/security/vulnerability-reports>
- AoB
 - Revisit whether we continue to build/test/publish jdk8 arm32 linux (not published for July as not TCK compliant, not in main/master openjdk branch, download numbers ?)

Action items:

Date	Description	Status
None		

Attendees

- ☐ George Adams
- ☐ Stewart Addison
- ☐ Scott Fryer
- ☒ Severin Gehwolf

- ☒ Shelley Lambert
- ☒ Andrew Leonard
- ☐ San Hong Li
- ☒ John Oliver
- ☐ Martijn Verburg
- ☐ Emeritus: Tim Ellison

Minutes:

Meeting start: 14:06

- Approved the [minutes](#) from Aug 12, 2026 and the statement from August 19, 2026.
 - Conversation about what is 'quorum' for this group. Today we will assume 4 is a quorum counting Tim as an Emeritus member, but will pose this to the Slack channel for input from all members (and also look at the EF developer handbook again).
 - Given we have members in challenging timezones, we can also look to putting more decisions up as Slack polls in the private channel to ensure we can collect all PMC members input.
- Review of outstanding actions.
- Review of GitHub [issues](#) and [discussions](#) flagged for PMC agenda
- August CSPU update
 - August is going as well as July (based on scorecards)
 - Looking at more automation to make this cadence more achievable, also noting the rework of the build pipelines that Andrew is undertaking will help this case also.
 - Discussion leads to the mirror script work and how JDK8 alpine Linux mirror is different and needs special handling. This also triggers the conversation around what platforms we ship and that we may want to review the tables again (given the item in the AOB section, JDK8 arm Linux).
- EF security tickets (find PMC members to own / bring to resolution)
 - Review of the list found at: <https://gitlab.eclipse.org/security/vulnerability-reports> led to questioning how these are assigned. Is it project leads or some other method for selecting assignees? Shelley will be adding it as a regular item to review on the PMC agenda.
 - ACTION: Shelley to find out how these are assigned.
 - ACTION: Shelley to take a look at the project leads list and start 'cleaning the lists' up by inviting non-active folks to retire themselves.
- AoB
 - Revisit whether we continue to build/test/publish jdk8 arm32 linux (not published for July as not TCK compliant, not in main/master openjdk branch, download numbers ?) - Can bring to future discussion, but if we do want to move in this direction, we can do as done for Win32 and Solaris, where it is first socialized via blog post and open issue to solicit feedback, find interested parties or funds that may help make a final decision.

Meeting end: 14:34
