Adoptium
Project Management Committee
Agenda & Minutes

"The PMC as a whole, and the PMC leads in particular, are ultimately responsible for ensuring that the Eclipse Development Process is understood and followed by their Projects. The PMC is additionally responsible for maintaining the Top-Level Project's charter." [ref]

Date: 2026-10-28

Agenda:

- Approval of minutes or statements from the Oct 21, 2026 meeting.
- Review of outstanding actions.
- Review of GitHub issues and discussions flagged for PMC agenda
    - Confirm with PMC that we switch our CA Certs Updater to use release to manufacturing (RTM) latest tag instead of 'release' which can be delayed by weeks
- Review of EF security vulnerability-reports
- Release status update
- AoB
    -

Action items:

Date	Description	Status
	Shelley to update security teams on all projects and sub-projects to be the PMC members.	TBD
	Check how to receive updates from gitlab	TBD

Attendees

- ☐ George Adams

- [x] Stewart Addison
- [ ] Scott Fryer
- [x] Severin Gehwolf
- [x] Shelley Lambert
- [x] Andrew Leonard
- [ ] San Hong Li
- [ ] John Oliver
- [ ] Martijn Verburg
- [ ] Tim Ellison

Minutes:

Meeting start: 14:10

- Minutes from the Oct 21, 2026 meeting are approved
- Review of outstanding actions. Owned by Shelley, not progressed.
- Review of GitHub issues and discussions flagged for PMC agenda
    - Confirm with PMC that we switch our CA Certs Updater to use release to manufacturing (RTM) latest tag instead of 'release' which can be delayed by weeks.
    - Do we have a way to automatically ensure that CA Certs changes are reported in release blog posts and release notes? Not at the moment, it's been a manual addition, but we can add automation. Will create issues to ensure:
        i. we are alerted to changes from the updater workflow (new Slack channel called build-alerts will include this and the other updates that are currently being pushed to the build channel)
        ii. when certs change that it will get included in a release blog post
        iii. update release notes generator script to add a section that checks the repo for certs changes and includes them in the generated release notes.
- Review of open EF security vulnerability-reports
    - 2 within last week relating to eMudhra (comments have been added to both to let them know a fix is part of our October release)
    - 1 other we have recommended reporting upstream and have closed
- October release status update
    - going well despite various bumps in the road (eMudhra fixed and JDK 17, 21, 25, 27 pipelines launched and include fix) - see blog post https://adoptium.net/news/2026/10/temurin-october-2026-emudhra
    - 32 of 64 are published (of the remaining 32, 18 of 64 are the JDK 8 and JDK 11 products, still waiting for upstream tags, 6 are AIX which are fully blocked due to no nodes in the temurin compliance project. Shelley is reaching out to see if there is a fallback plan, as the nodes previously available from Azure via Kyndryl have disappeared)

    - Need to fix API as there has been a change to the release notes json file (to have a new field called backportedBy which is likely causing the API not to be able to push the files into MongoDB so they are not visible on the website)
- AoB
    - We will plan to publish a release blog post this week for JDK 17+ (since 8 and 11 are delayed and we should get something out sooner than later)

Meeting end: 14:41
